

EUROPE

THE map shows the great North European Plain that stretches from the Atlantic Ocean to the Ural Mountains in Russia. This huge area of lowland has most of Europe's best farmland, and many of the biggest cities.

To the north of the plain are the snowy mountains of Scandinavia. To the south are even higher mountains: the Pyrenees, the Alps and Carpathians, and the Caucasus Mountains. Southern Europe has hills and mountains by the Mediterranean Sea. The areas of lowland are carefully farmed.

PUZZLE

The most important building in Europe?
• Where is it found?
(Answer on page 97.)

EUROPE FACTS

AREA 10,531,000 sq km (including European Russia)
